

Eliminate
The Risk
And Hassle
of Checks.

Two Ways To Make Checks As Good As Cash.

TeleCheck's Check Guarantee Service continues to be the gold standard in

check acceptance.

When TeleCheck approves a check, you know it's good.

This means you can accept

low-numbered, out-of-town, even out-of-state checks with confidence, knowing that you have the industry's most sophisticated check approval system backing you up.

Now TeleCheck offers two ways for you to guarantee checks. The original paper Check Guarantee service or the TeleCheck Electronic Check Acceptance® (ECA®) service, the process that combines the benefits of paper checks with the safety, speed and ease of electronic funds processing.

The Power Of The Check Without The Paper

Designed to mirror the process used to settle credit cards, the ECA service converts paper checks into electronic items at the point of sale and not only guarantees these items, but also automatically deposits the funds directly into your account, improving cash flow. The ECA service delivers a streamlined check acceptance process and eliminates returned checks, returned check fees, warranty claims, and hassles. It also means reduced paperwork and faster closing/balancing and settlement.

With TeleCheck, you can safely allow your customers to choose their preferred payment option - checks.

ECA Service is The Preferred Way To Accept Checks.

The TeleCheck Electronic Check Acceptance® (ECA®) service is simple. After the check writer presents his check, the clerk authorizes it through TeleCheck and gives the check writer a printed receipt for signature. This signature allows TeleCheck to electronically present the transaction to the check writer's bank for settlement. And, because the electronic transaction is guaranteed, if it falls to clear the check writer's account, you'll still be funded. The returned check or transaction becomes TeleCheck's responsibility.

Paper Check Guarantee. Now Better Than Ever.

We continue to offer our traditional paper Check Guarantee service. And, thanks to recent technological advances in our risk management

systems, this service is now better than ever. TeleCheck automatically warrants the full amount of any check it approves, provided all of TeleCheck's simple procedures have been followed.

And, TeleCheck's reimbursement period for paper checks is short. Merchants may be reimbursed as quickly as seven days after the check has been received by TeleCheck with Automated Clearing House (ACH) settlement of monthly billing.

TeleCheck's Eclipse terminal and services offer everything you need at the point of sale to accept checks, credit and debit cards.

The Eclipse Terminal Makes It Happen.

The TeleCheck Eclipse™ payment terminal is the vehicle that drives both of our check guarantee services. It processes checks, credit and debit cards all in one integrated device. And, with the ECA service, it enables the conversion of a check into an electronic item that becomes the basis for this paperless transaction.

TeleCheck. The Check Experts.

Both check guarantee services demonstrate TeleCheck's continuing commitment to make it possible for you to safely allow your customers to choose their preferred payment method.
